ORCID ID: <http://orcid.org/0000-0001-7259-8134>

---

Working as the library director at IZTECH for 17 years.

---

Bachelor's Degree from Hacettepe University, Library Science Program (currently the Information Management Program), and a Master's Degree from Kocaeli University, Business Administration.

---

Participated in OpenAIREPlus, OpenAIRE2020, and OpenAIRE Advance projects.

---

Working as an OpenAIRE Turkey NOAD since 2011 by actively engaging with the rest of the project team.

---

A board member of OpenAIRE.

---

A founder partner of Research Ecosystems, an R&D Company established within IZTECH Technopark in 2021.

# Izmir Institute of Technology

izmir

## IZMIR

- "Izmir" probably derives from the former Greek name "Smyrna"
- 3,500 years of recorded urban history
- The second largest port and the third largest city in Turkey
- Population: 4,455,294
- Mediterranean climate

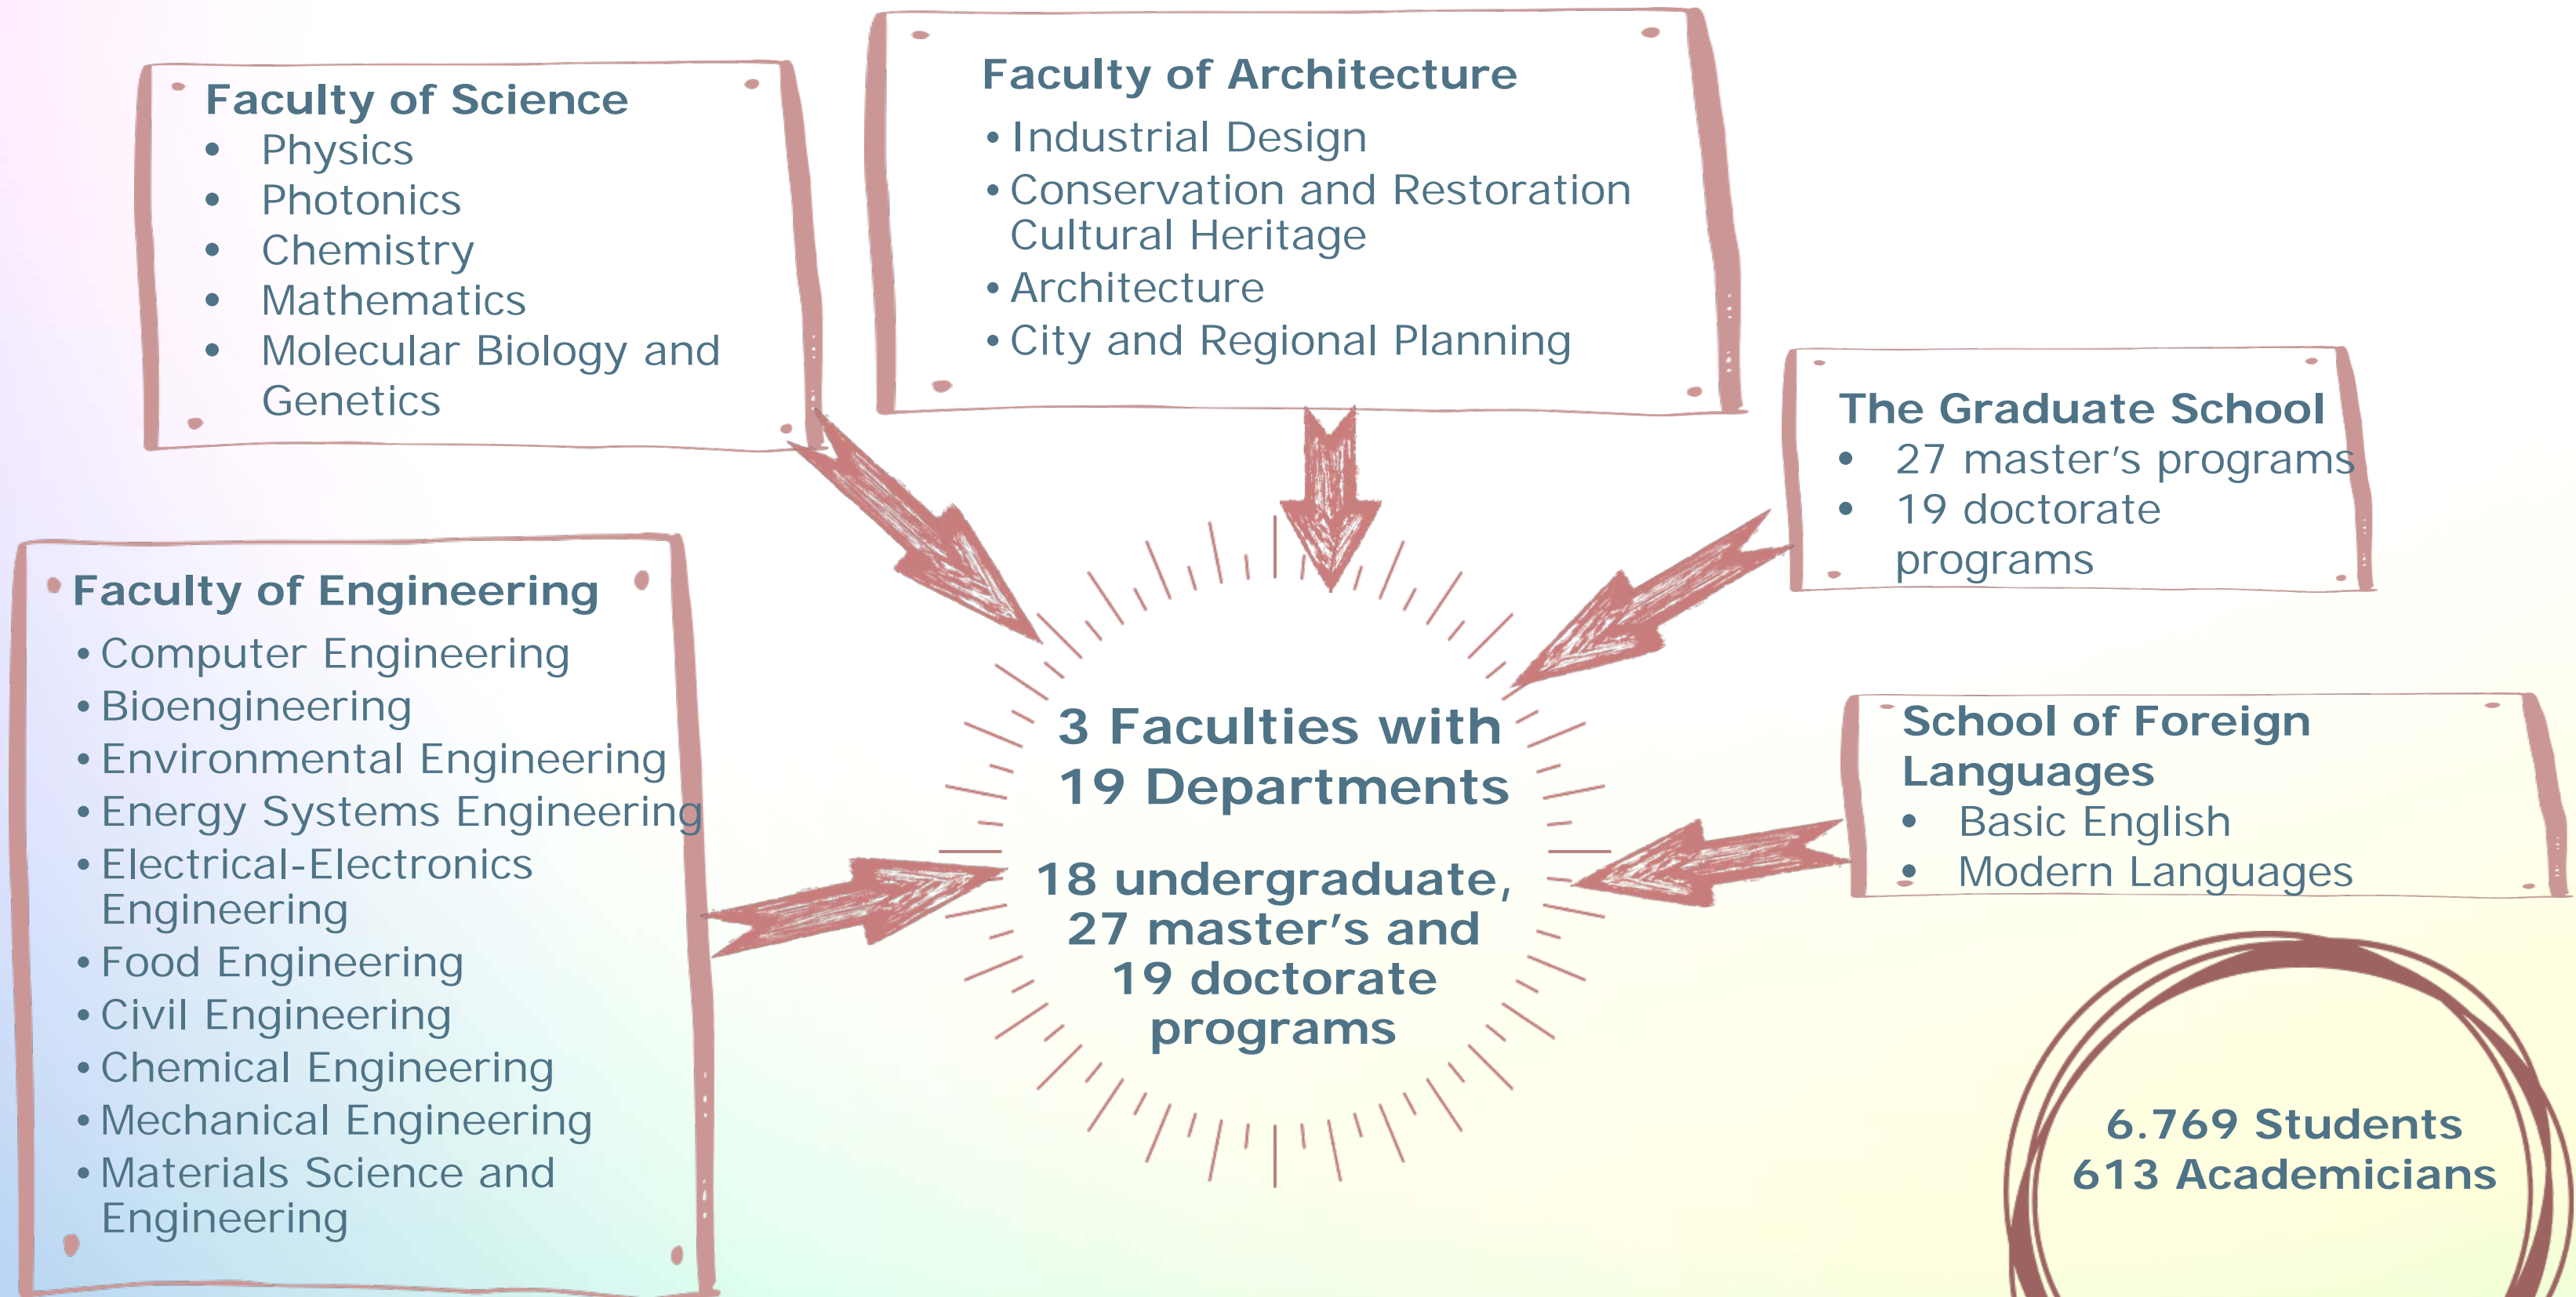

## IZMIR INSTITUTE OF TECHNOLOGY

- Founded in 1992 as a state university
- The only internationally distinguished advanced technical university in Turkey
- Emphasis on education and research in science and technology
- Language of instruction is English
- The campus is in Gulbahce /Urla/Izmir
- 3.500 hectares campus area & 132.000 square meters closed area (The biggest campus area in Izmir)

**THE AWARDS ASIA 2022**

**IZTECH made it to the shortlist in two categories at THE Awards Asia 2022**  
International Strategy of the Year & Student Recruitment Campaign of the Year

**IZTECH Made It to the Shortlist in Two Categories at THE Awards Asia 2022**

15 April 2022 Manşet

The shortlist results of THE Awards Asia 2022, known as the Oscars of higher education and organized by the well-recognized international ranking platform Times Higher Education (THE), which aims to recognize outstanding leadership and institutional performance among higher education institutions in the Asian continent, have been announced.

Izmir Institute of Technology was shortlisted in the categories of "Internationalization Strategy of the Year" and "Student Recruitment Campaign of the Year".

In THE Awards Asia 2022, in which nearly 500 entrants from all corners of the Asia and the Middle East competed, and many prestigious universities from countries such as Japan, China, India, Malaysia, Hong Kong, Singapore, and South Korea took part as finalists, IZTECH was the only university in Turkey to be shortlisted.

# International Memberships

Being part of international community is important...

### Executive Board

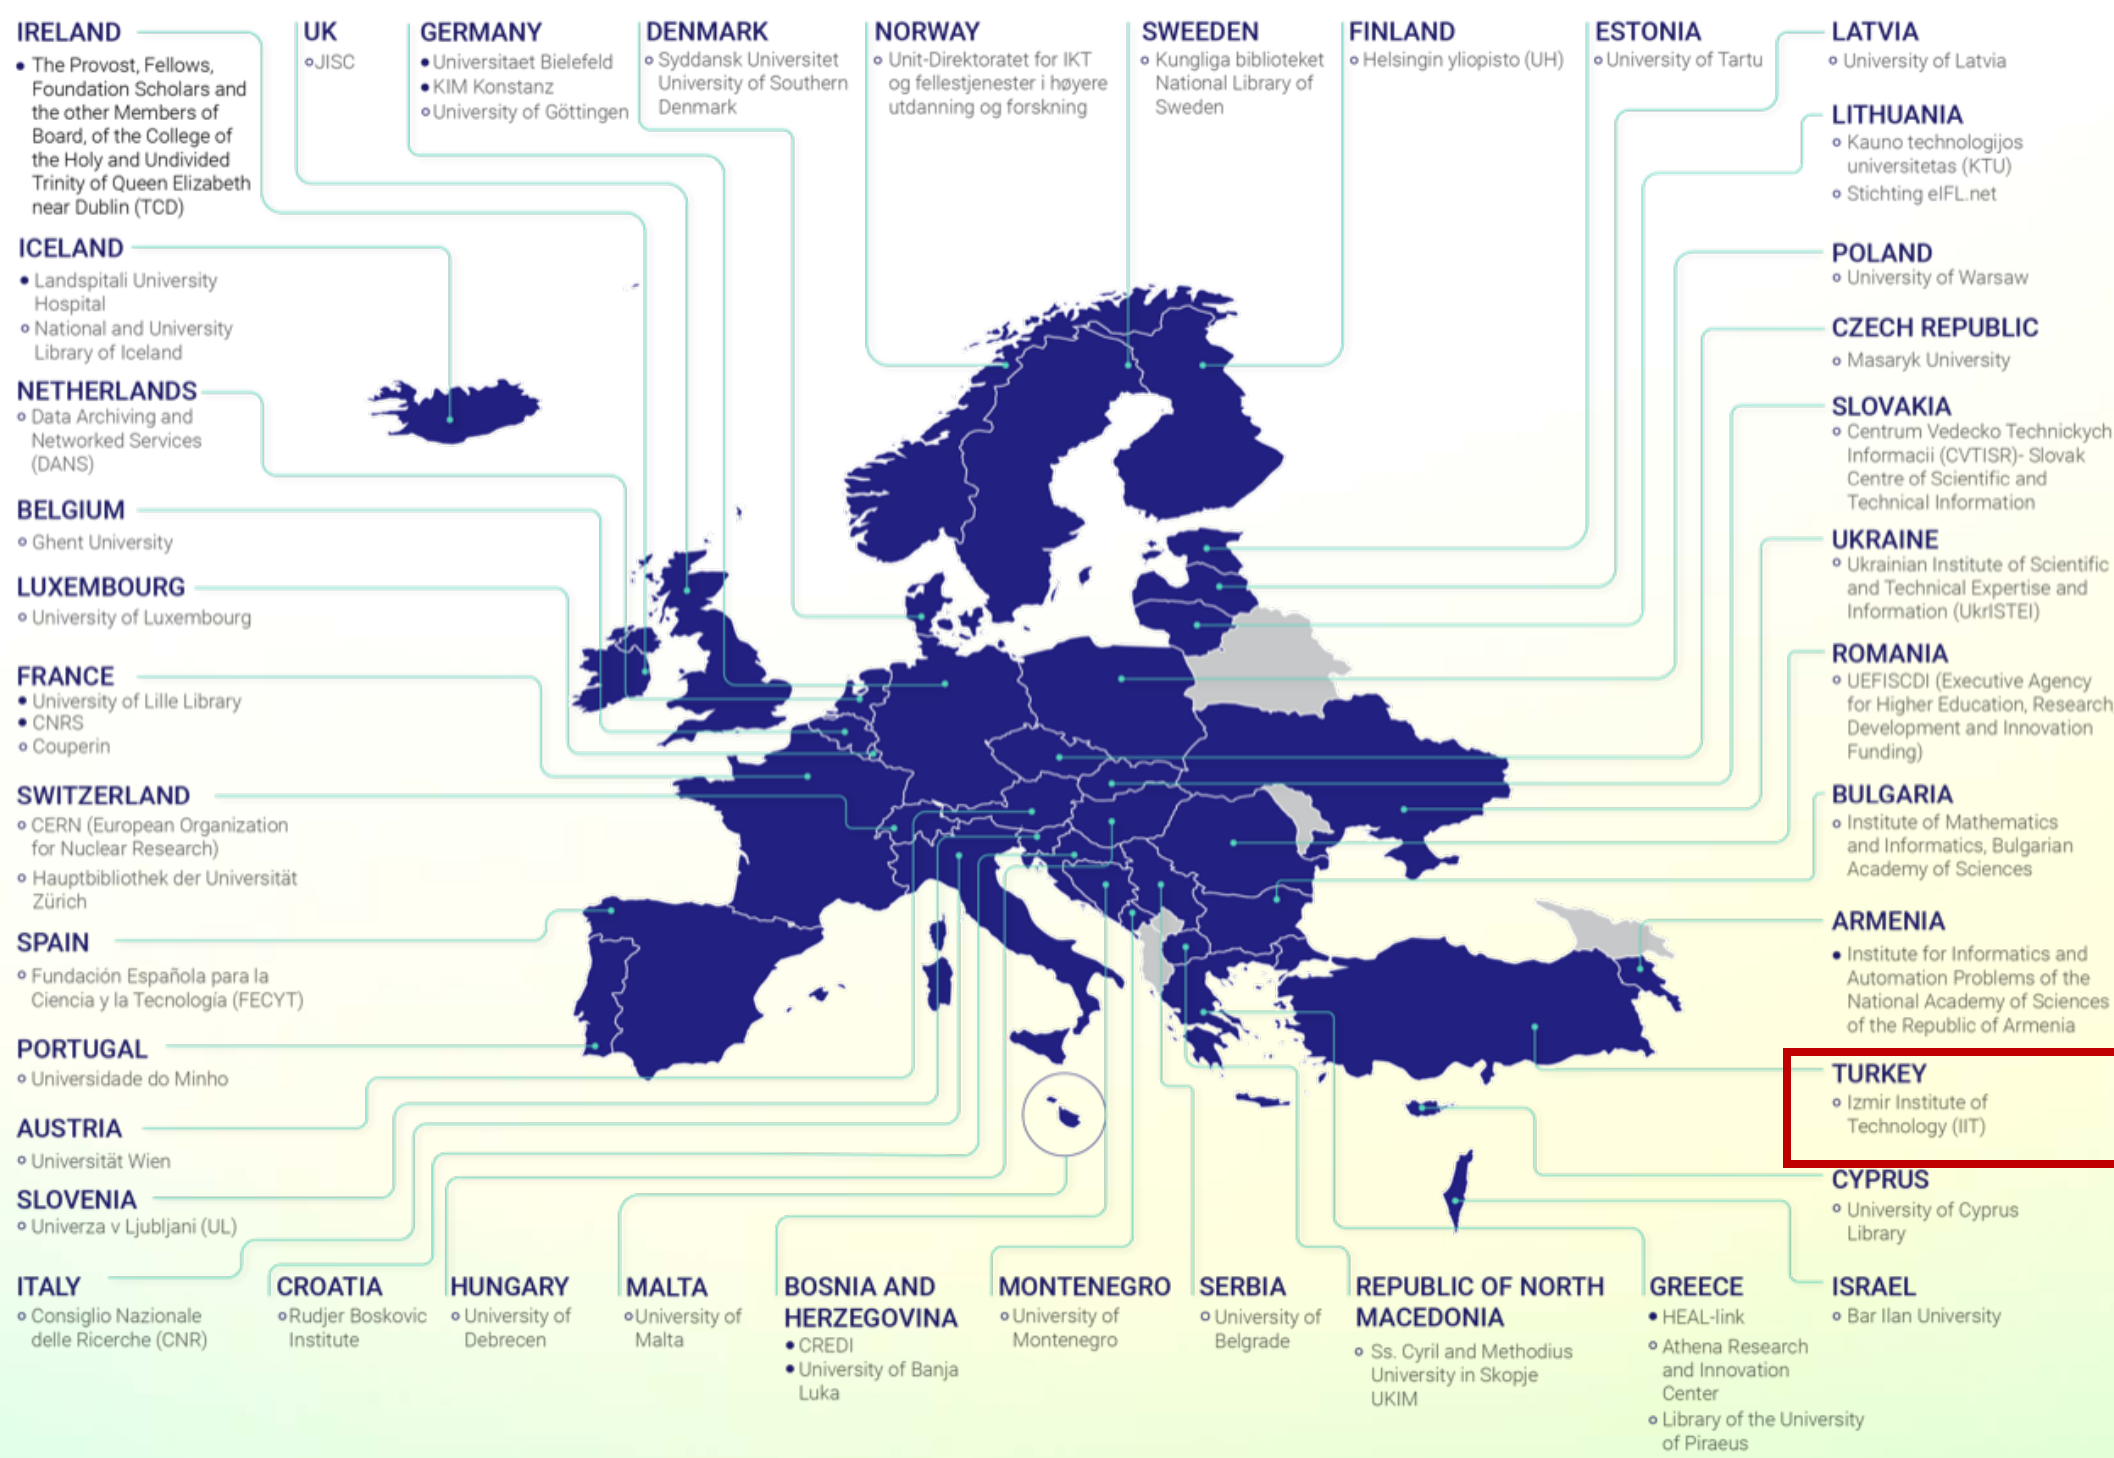

The Executive Board is composed of eight experts in Open Science. Its role is to steer, evaluate and advance the implementation of the strategic directions of the OpenAIRE e-Infrastructure.

The chair of the Executive Board and General Assembly is Inge Van Nieuwerburgh.

**Özet:** Akademik camiada ortak çıkarların yaratılması amacıyla bilginin paylaşılmasına arnağan edilmiş toplumsal bir hareket olan Açık Erişim, bugün dünyada pek çok bilim insanı, yayınevi ve araştırmacı tarafından desteklenmektedir. Açık erişimin temelini oluşturan kurumsal arşiv sistemleri için kullanılan yazılımlar, ücretsiz olan açık kaynak kodlu yazılımlar ve çeşitli firmalar tarafından geliştirilen ücretli paket programlardan oluşmaktadır. İlk sürümü 2002 yılında kullanıma sunulan DSpace Massachusetts Teknoloji Enstitüsü (MIT) ve Hewlett Packard (HP) işbirliğiyle geliştirilmiş açık kaynak kodlu kurumsal arşiv yazılımıdır ve Kasım 2012 itibarıyla dünyada 1.360'tan fazla kurum tarafından kullanılmaktadır. Bu çalışmada, açık erişim ve kurumsal arşivler üzerinde durularak, DSpace kurumsal arşiv yazılımının özellikleri ve açık erişim girişimlerine olan katkısı vurgulanmaya çalışılmıştır.

**Anahtar Sözcükler:** Açık Erişim, Kurumsal Arşivler, DSpace Yazılımı

**Open Access and DSpace Institutional Repository System**

**Abstract:** The Open Access movement is a social movement in academia, dedicated to the principle of open access - to information - sharing for the common good and is being supported by many scientists, publishers, and researchers in the world, today. The software that is used to operate the institutional archive systems which are the basis of the Open Access, are divided into two forms of some free open source software and paid package programs which were developed by some corporates. DSpace, whose first version was presented to use in 2002, is an open source archive software which was developed with the co-operation of Massachusetts Institute of Technology and Hewlett Packard and is being used by more than 1.360 institutions all over the world as of November, 2012. The aim of this study is to highlight the features of the DSpace institutional archive software and its contributions to the open access initiatives by emphasizing the open access and institutional archive.

**Keywords:** Open Access, Institutional Repositories, DSpace

### İYTE GCRIS Database

GCRIS Database is a research and performance evaluation information system that enables searching and discovering all research outputs within the Izmir Institute of Technology research ecosystem, associating these outputs with researchers, providing advanced reporting with different metrics, and supporting corporate strategic decisions. Besides, it is an institutional repository at international standards that brings together and organizes all kinds of academic outputs related to research activities and allows sharing with the whole scientific world by providing long-term preservation.

Projects 982

Distribution

Working on integration of Controlled Vocabularies with İYTE GCRIS and accelerating to implementation of good practices in Turkey.

Simulation-Optimization of a Patented Baffle Design with Parallel Computing on TRUBA

Kuzay, Mustafa ; Nasyrlayev, Nazhmiddin ; Demirel, Ender

Treatment of surface waters in large cities has been emerged as a critical point of interest for governments in recent years with increasing clean water demand and development of energy intensive water treatment technologies such as ozone and ultraviolet. Raw water is mixed with the disinfectant in a multi-chambered contact tank at the last stage of the treatment procedure to remove viruses and pathogens from the water. An efficient contact system is required for the effective disinfection of water with less disinfectant and energy usage, whereas conventional mixing systems suffer from low...

What is Aperta?

Aperta is the name of the Turkish Open Archive.

You can upload your scientific studies within the scope of Aperta to this portal or you can easily access the uploaded studies.

What is the Scope of Aperta?

- **Safe and Reliable** – Your data is securely stored by ULAKNET as long as it exists at TUBITAK ULAKBİM.
- **DOI Support** – a Digital Object Identifier (DOI) is assigned to make records referenceable and traceable.
- **No waiting time** – as soon as you hit the Publish button, uploads are available online and your DOI is saved within minutes.
- **Open or closed** – For example, anonymized clinical trial data can only be shared with medical professionals through the restricted access mode.
- **Versioning** – Easily update your dataset with versioning
- **Usage statistics** – All downloads can be viewed with standards-compliant usage statistics.

# Open Science Policy in Turkey: National Policy

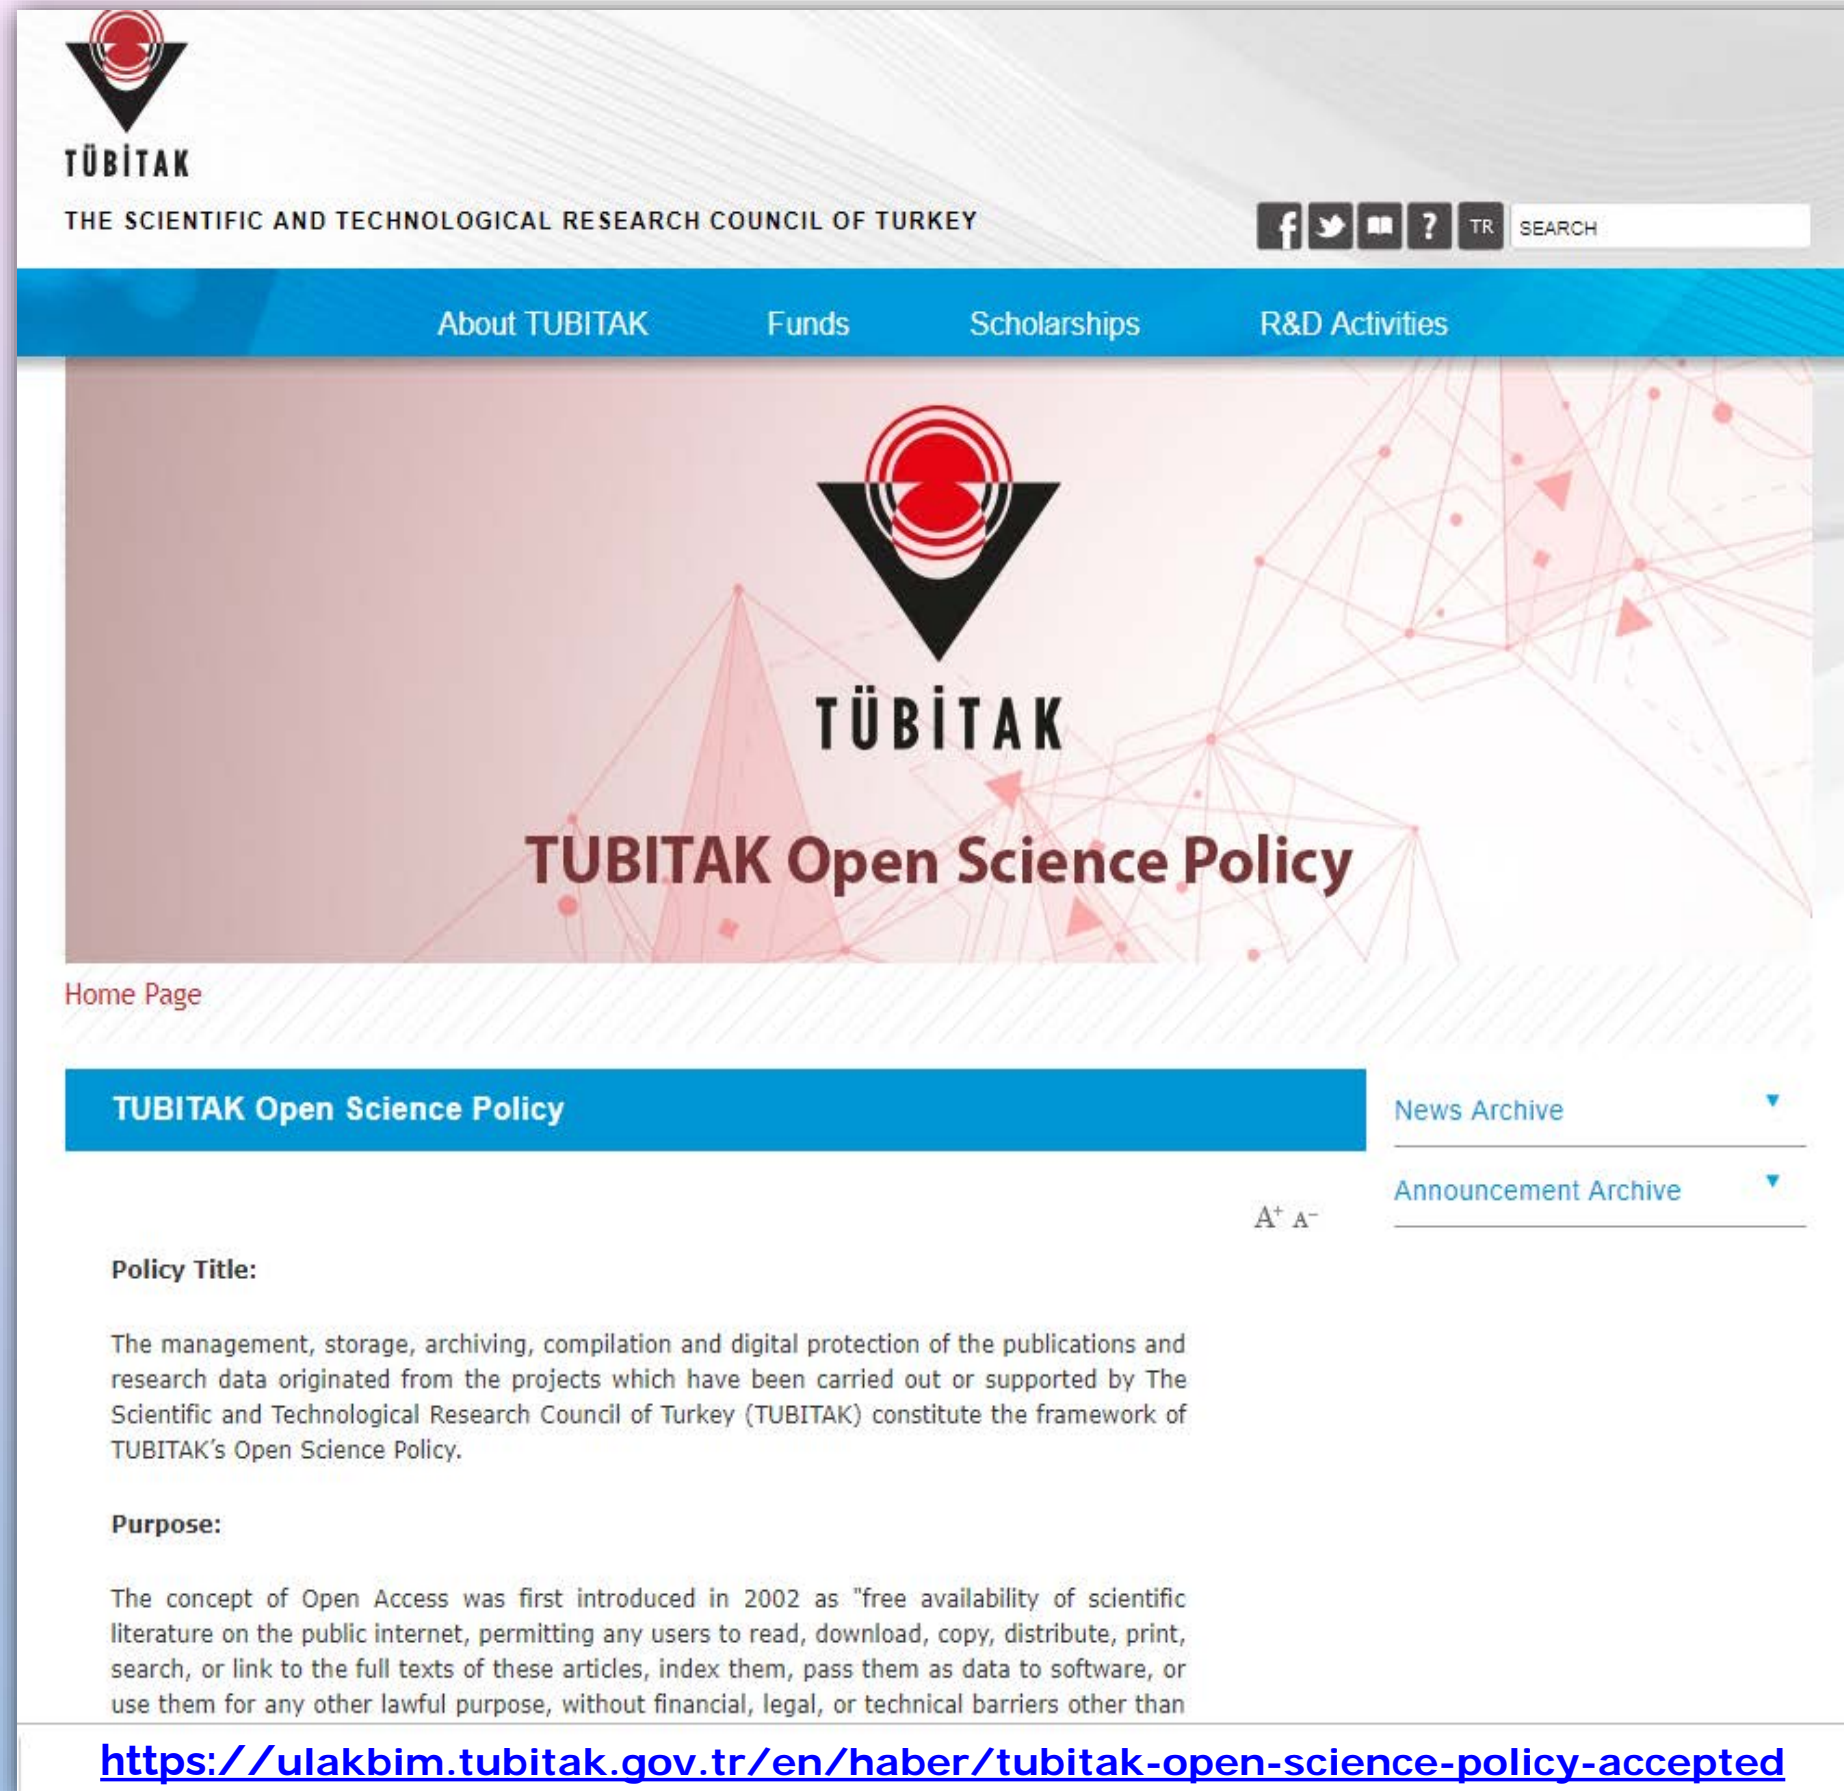

The screenshot shows a blog post from OpenAIRE. The header includes the OpenAIRE logo and the text 'OpenAIRE BLOG'. Below the header, there is a notice: 'THIS BLOG HAS BEEN DISCONTINUED. Please acc...'. The main title of the post is 'Open Access to Theses and Dissertations in Turkey has been Enacted by the Parliament'. The author is 'Gültekin Gürdal' and the date is '2018-08-07'. The post is categorized as 'country highlights' and has '48' likes. The date '07.08.2018' is highlighted in a dark blue box. The main text of the post discusses the implementation of compulsory open access to theses and dissertations in Turkey, mentioning the Council of Higher Education (YÖK) National Theses Center and Turkey OpenAIRE NOAD. A quote from the regulation is provided in a light blue box: 'Unless a decision of secrecy is taken by the authorized institutions and organizations, the graduate theses shall be opened to access in electronic environment by the National Theses Center of the Council of Higher Education in order to contribute to science.' The post concludes by stating that it is compulsory to send all theses and dissertations to the YÖK National Theses Center and that the Directive on Collecting, Organizing and Opening to Access The Theses and Dissertations in Electronic Environment is prepared in cooperation with YÖK National Theses Center and OpenAIRE NOAD Turkey and shared with all universities in the country. It also mentions that before this regulation, theses and dissertations were closed to access for 3 years in accordance with the request of the respective author, but now access is no longer possible to prevent access to theses and dissertations except for the provisions of the regulation.

The number of downloads of theses has exceeded 16 million.

A<sup>+</sup> A<sup>-</sup>

**Policy Title:**

The management, storage, archiving, compilation and digital protection of the publications and research data originated from the projects which have been carried out or supported by The Scientific and Technological Research Council of Turkey (TUBITAK) constitute the framework of TUBITAK's Open Science Policy.

**Purpose:**

The concept of Open Access was first introduced in 2002 as "free availability of scientific literature on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, index them, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than

<https://ulakbim.tubitak.gov.tr/en/haber/tubitak-open-science-policy-accepted>

- The Scientific and Technological Research Council of Turkey (TUBITAK) accepted Open Science Policy on March 14, 2019.
- Based on OpenAIRE model Policy on Open Science for Research Funding Organisations (RFOs).
- It covers publications (peer-reviewed articles, etc.) and research data which is produced by TUBITAK support, completely or partially, and the publications and research data of TUBITAK researchers.
- It has been deemed appropriate to implement the policy to pilot programs in 2019 and all support programs in 2020.
- The number of researchers affected by this policy is ~ 25.000

## IYTE GCRIS Database

GCRIS Database is a research and performance evaluation information system that enables searching and discovering all research outputs within the Izmir Institute of Technology research ecosystem, associating these outputs with researchers, providing advanced reporting with different metrics, and supporting corporate strategic decisions. Besides, it is an institutional repository at international standards that brings together and organizes all kinds of academic outputs related to research activities and allows sharing with the whole scientific world by providing long-term preservation.

Thermal energy storage

Issue Date: Dec-2015

Publisher: Elsevier

Source: Tokuç, A., Başaran, T., and Yesügey, S.C. (2015). Experimental data showing the thermal behavior of a flat roof with phase change material. *Data in Brief*, 5, 476-480. doi:10.1016/j.dib.2015.09.019

Abstract: The selection and configuration of building materials for optimal energy efficiency in a building require some assumptions and models for the thermal behavior of the utilized materials. Although the models for many materials can be considered acceptable for simulation and calculation purposes, the work for modeling the real time behavior of phase change materials is still under development. The data given in this article shows the thermal behavior of a flat roof element with a phase change material (PCM) layer. The temperature and energy given to and taken from the building element are reported. In addition the solid-liquid behavior of the PCM is tracked through images. The resulting thermal behavior of the phase change material is discussed and simulated in [1] A. Tokuç, T. Başaran, S.C. Yesügey, An experimental and numerical investigation on the use of phase change materials in building elements: the case of a flat roof in Istanbul, *Build. Energy*, vol. 102, 2015, pp. 91-104.
