CONSERVATION AIMED EVALUATION OF DARKALE RURAL SETTLEMENT IN SOMA, MANİSA

VOLUME II

A Thesis Submitted to the Graduate School of Engineering and Sciences of İzmir Institute of Technology
In Partial Fulfillment of the Requirements for the Degree of

MASTER OF SCIENCES
in Architectural Restoration

by
Ayşen ETLACAKUŞ

July 2015
İZMİR
# TABLE OF CONTENTS

LIST OF FIGURES ........................................................................................................ ix

LIST OF TABLES ........................................................................................................ xv

CHAPTER 1. INTRODUCTION ................................................................................. 1
  1.1. Preliminary Studies .......................................................................................... 6
  1.2. Definition of the Problem ............................................................................... 8
  1.3. Aim, Limitations, Methodology and Terminology ....................................... 10
  1.4. Content of the Study ..................................................................................... 14

CHAPTER 2. GEOGRAPHIC CHARACTERISTICS ............................................... 16
  2.1. Location ......................................................................................................... 16
  2.2. Topography and Rural Settlement ................................................................ 19
  2.3. Climate .......................................................................................................... 23
  2.4. Flora and Fauna ........................................................................................... 23

CHAPTER 3. HISTORICAL DEVELOPMENT ......................................................... 26
  3.1. Name and Etymology .................................................................................... 26
  3.2. Development of the Region .......................................................................... 27
  3.3. Conservation Decision .................................................................................. 34
  3.4. Social, Cultural and Economic Characteristics ......................................... 36

CHAPTER 4. HERITAGE CHARACTERISTICS ....................................................... 45
  4.1. Tangible Characteristics ............................................................................... 45
    4.1.1. Cultural Landscape Characteristics ....................................................... 45
      4.1.1.1. Geographic Elements ...................................................................... 45
      4.1.1.2. Usage of Natural and Man-made Elements .................................... 48
5.2.2. Typology of the Buildings of the Rural Settlement of Darkale .... 138
  5.2.2.1. Position ................................................................. 139
  5.2.2.2. Relation with Neighbors ...................................... 142
5.2.3. Threats for the Integrity of the Settlement of Darkale ........... 147
5.3. Evaluation of the Housing Units in Darkale ....................... 151
  5.3.1. Values of Housing Units ......................................... 152
  5.3.2. Typology of the Living Floors of the Housing Units ......... 152
  5.3.3. Threats for Housing Units ...................................... 161

CHAPTER 6. CONCLUSION .......................................................... 162

REFERENCES ........................................................................... 166

APPENDICES
APPENDIX A. SITE IDENTIFICATION ........................................... 172
APPENDIX B. HOUSING UNITS IDENTIFICATION ....................... 194
APPENDIX C. ARCHIVE DOCUMENT ......................................... 503
APPENDIX D. JOURNAL ARTICLES .......................................... 517
Figure A.1. Thematic maps of the rural settlement of Darkale
Figure A.2. The analysis of the listed heritage of the rural settlement
Figure A.3. The analysis of the geographic features of the cultural landscape
Figure A.4. The analysis of the usages of natural and man-made elements of the cultural landscape
Figure A.5. The analysis of the circulation pattern of the cultural landscape
Figure A.6. The evaluation of authentic characteristics of the cultural landscape
Figure A.7. The typology of the elements of the cultural landscape
Figure A.8. The evaluation of the threats ruining the integrity of the cultural landscape
Figure A.9. The analysis of the land use of the rural settlement
Figure A.10. The analysis of the solid-void organization of the rural settlement
Figure A.11. The analysis of the entrances and door number of the buildings of the rural settlement.
Figure A.12. The analysis of the ownership pattern of the rural settlement
Figure A.13. The analysis of the storey system of the rural settlement
Figure A.14. The analysis of the construction technique of the buildings of the rural settlement.
Figure A.15. The analysis of the roof types of the buildings of the rural settlement
Figure A.16. The analysis of the conservation state of the rural settlement
Figure A.17. The analysis of the lot organization of the buildings of the rural settlement
Figure A.18. The site sections of the rural settlement
Figure A.19. The evaluation of the authentic characteristics of the rural settlement
Figure A.20. The typology of the buildings of the rural settlement
Figure A.21. The evaluation of the characteristics threatening the integrity of the rural settlement
Figure A.22. The evaluation of authentic and ruining integrity characteristics of the silhouette of the rural settlement
Figure B.1. The photos of the surveyed housing units
